(II) 閱讀測驗, 請選出最適合的答案。(6%)

We need a lot of water every day for drinking, cooking, and washing. In Taiwan, getting fresh water is very easy. We just need to turn on the faucet, and fresh water will come out of it. But, getting water for their family takes some people hours every day. They do not go with cars, bikes, or scooters. They walk to get it.

In Danganmal, getting water is not easy because there is no water in this small town. The only drinking water comes from two wells at the foot of a hill. It is far away from the town. Walking there and going back home take people twelve hours. Usually, women need to get water for their family. Getting enough water is not easy for a woman because she needs to take care of the children and help on the farm. A man gets married with a "water wife" because the water wife can help to get water. This was an example. Yuki's husband had three wives. Her husband's second and third wives married again after their husbands died. They can get status after they get married again. In her town, a woman without a husband can't have a better life. Women in the town have a hope. Having clean water to get near their homes is their dream.

	fresh water	清水	will	將要	faucet	水龍頭	well	井
	far away	離...很遠的			take	花費(時間)	married	結婚的
	example	例子	die (died)	死亡	status	地位	better	更好

(A) They need to walk twelve hours to get water. (B) Because they are not married.
(C) They need to do lots of work for their family. (D) Because they are "water wife".
- () 2. Why does a man in Danganmal want to marry a "water wife"?
(A) He has to take care of many children.
(B) His "water wife" can teach him to get water.
(C) A "water wife" can teach his wife to get water.
(D) He needs a "water wife" to get water for his family.
- () 3. What is true?
(A) Men in Danganmal die when they are young.
(B) Women get married with their husbands because they can get status and live better.
(C) Men in Danganmal usually have three wives because they need water.
(D) Women like to get married with men because their husbands can get clean water.
