(C) used to be ; was ; will have (D) is ; is ; will have

五、閱讀測驗 (每題 2 分，共 10 分)

Do you still like the color on your car? A new technology from BMW will let you change it at on touch of a button. BMW brought in the new type of car at a technology show in January, 2022. It is the world's first color-changing car, called the BMW iX Flow. However, the trick has nothing to do with the paint at all, but with the E Ink technology.

BMW worked with a team from Taiwan, and they used the E Ink technology for the car. To allow the car to change colors, they covered it with a special kind of thick paper. The cover had a differently charged white and black pigments. When we put on the electric charge through the cover, the color pigments will rise and come down to change the color of the car. Right now, the car can only change colors to white, gray, or black.

BMW says the color-changing cars can make them more relaxed. On hot days, white cars will stay cooler than black ones because they reflect more sunlight. In the same way, black colors help the car get more sunlight and more heat. Unluckily, BMW isn't planning on bringing the car to market because the cost of making it is too high. But maybe we can see it on the market one day.

technology 科技 charge 充電 pigment 顏料 allow 允許
cover 覆蓋 thick 厚的 electric 電的 reflect 反射 relaxed 舒適的
sunlight 陽光 ink 墨水 touch 觸碰

BMW iX Flow

26. What idea does the writer talk about in the reading?

- (A) What makes the car useful? (B) Where can people buy the car?
